

ARTECO
INTELLIGENT VIDEO SOLUTIONS

*The Power of Seeing...
Without Watching*

Medical Research

- Medical Research facility requires advanced video security for highly sensitive proprietary materials
- Intelligent Video applications required across multi-site organization
- Installation integrates ten office locations, two production facilities and equipment

System Features

- Perimeter Active Surveillance
- Activation/Deactivation of the system with a regular remote control
- Event triggered recording and detection of lingering person(s) in the area next to sensitive buildings
- Continuous recording on every channel

Benefits

- Security Gate integrated with IVS system activation/deactivation
- Crime deterrent
- Alarm notification via SMS on cell phones
- Complete remote managing of the systems anywhere in the world
- Integration with other pre-existing security devices such as access control
- Increase in total security
- Decrease in total insurance cost

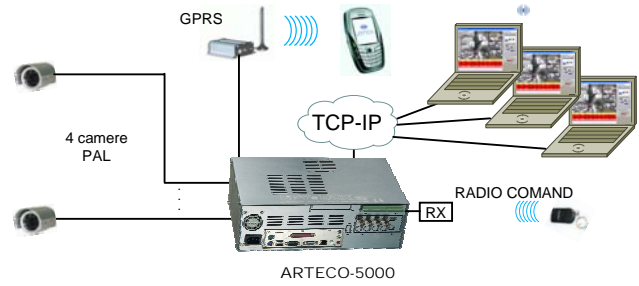

What they say about us

- "Thanks to the Arteco Intelligent Video Solution we have gained total control of all our buildings across the country 24/7" (Giovanni Goggioli, CEO Medilab-PD)

Monitoring Station

How it works

IVS and Gate Synchronization

Perimeter Control

The Arteco IVS installation inside a 19" rack
