ARTECO-SERVER

Small Business

- VIDEO MANAGEMENT SOFTWARE (VMS) FOR RECORDING AND LIVE DISPLAY OF IP VIDEO
- MOTION DETECTION STANDARD ON ALL VIDEO CHANNELS
- SOFTWARE COMPRESSION BASED ON NATIVE IP OF CAMERA

ARTECO-SERVER SMALL BUSINESS is delivered as a software license of to be used as an IP solution on a PC-based system.

Designed for ease-of-use with installation and operation, ARTECO-SERVER SMALL BUSINESS is the ideal solution for simplified viewing of live and recorded IP-based video.

Each individual camera operates on the Native IP stream from the IP camera of choice from leading camera providers.

Video Motion Detection (VMD) is included in the software for every camera channel, creating time-stamped events with pre and post-event recording and real-time alert notification.

Video is accessible through the Client Software, ARTECO-LOGIC (included), on a network connected PC as well as through the iPhone® app, ARTECO-VIEWER, available through iTunes® (sold separately). Multiple locations can be viewed from a single remote session.

ARTECO-SMALL BUSINESS offers the performance of a professional-grade VIDEO MANGEMENT SOFTWARE (VMS) customized with the features and affordability that make it the perfect solution for a restaurant, office, medical practice, retail outlet, convenient store, or residential setting.
