

ARTECO
INTELLIGENT VIDEO SOLUTIONS

*The Power of Seeing...
Without Watching*

IPAB Assisted Living

The IPAB Assisted Living Center hosts 60 senior citizens in 33 rooms providing them health care and assistance.

Arteco was chosen to help the monitoring personnel to prevent falls to the residents of the center, especially during the night.

Software Function

- Both Patients and Perimeter monitoring
- Detects and alerts if an unauthorized patient is lingering in common areas during restricted time.
- Different audible alarms since the system is deployed in two floors
- One monitoring station per floor with video feeds of both floors
- Integrated with a switch to enable the audible alarms at the entrance of each floor
- Option to connect a camera to the patient's bed in order to monitor a single resident

Benefits

- Increase in the residents' security preventing physical accidents and falls.
- Increase in the efficiency of the monitoring personnel.
- Two monitoring stations that allow a global view of all the surveillance areas.
- A simple switch enables the audible alarms for maximum usability.

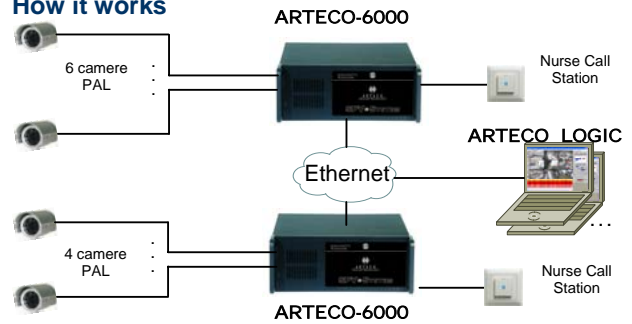

What they say about us

- "The Arteco Intelligent Video Solution allows us to provide better service to all the residents of the center especially those who suffer from Alzheimer's Disease. The System directs the monitoring personnel in the specific room where an event is happening which increases our overall efficiency." (Eloise Righi, PHD, Managing Director)
