INTELLIGENT VIDEO SOLUTIONS

*The Power of Seeing...
Without Watching*

Louisville Water Department

Since 1977, the Louisville Water Treatment Plant has been providing clean water to its community. Owned and maintained by the city of Louisville, Ohio, the utility provides water resources to over 3,300 households and businesses in the community. With a constant goal to provide a safe and dependable supply of drinking water, The Louisville Water Treatment Plant turned to Zadar Technology of Hinckley, OH and Arteco to proactively combat water contamination.

Customer Concerns

- Contamination of Water Supply
- Facility break-in, theft, and vandalism
- Employee Safety
- Unauthorized entry into facility perimeter
- Unauthorized personnel in restricted areas

Arteco Solution

- Violated Area applications detect entry in restricted areas in real-time.
- Virtual Tripwire at property entrance detects vehicles entering or leaving facility.
- Detection zones alert to personnel at key access points for facility main entrance.
- Event-log lists an exportable per channel audit trail of all security events taking place on premises.

What They Say About Us

“Intelligent Video offers a pro-active and cost-effective solution to water utilities, giving a higher security guarantee for their public service.”

-Ken Zadar, President of Zadar Technologies
